

MONDO BY DEFUNC

CREATED FOR AND BY THE CULTURE

The MONDO by Defunc brand combines the experience from Swedish sound design with the connections to the Swedish music industry in the new powerhouse called MONDO by Defunc, founded by a trinity of companies with extensive experience and tight connections to the Scandinavian music industry, its artists and creators associated with the music and urban scene.

Simply put - in all MONDO products, the sound should be enjoyed the way the artist intended.

The design elements should be clear reminders of our Scandinavian musical heritage.

It's about everything from buttons, switches and controls on the product's hardware to the unmistakable signature with the cut-off corner on the packaging, a musical language that dates back to the 80's vinyl record. We have music in our DNA and it follows us all the way from the design draft to artist collaborations. Meet first speaker - and let the world hear you!

MONDO BY DEFUNC

LOUD AS F**K

With 6 active drivers delivering 96W and 3 passive basses the MONDO SPEAKER LARGE is really LOUD! 2 active drivers for bass and mids, 2 active drivers for mids, 2 active drivers for high notes and the 3 passive basses for a super heavy bass.

3 APPEALING COLORS

We give you 3 color options, Metal Grey, Brass and Greige, choose your personal favourite. Go for a classic retro vibe or for the scandi light colors. No matter which color, the sound will impress you.

DESIGN ELEMENTS FLIRTING WITH MUSICAL HERITAGE

With an obvious 80's vibe, we continue flirting with our heritage and make sure we have those small details making you smile. It is retro, yet contemporary. Just the way we like it.

HEAVY BUT COMPACT DESIGN

We are not gonna lie, it IS a handful. It is sturdy, yet easy to transport and bring with you with the help of the shoulder strap. Bring it with you or let it be that great "je ne sais quoi" in your home
